

For employees, contractors and others attending a worksite to undertake any work (including office or home). For employers wanting to ensure a risk management process is completed when workers go to sites.

- Quick.** All-Purpose Risk Assessment Form on your phone.
- Handy.** Store safety, insurance and other documents you may need in the application ready to be sent to your clients
- Simple.** User Interface is designed to be easy for everyone to learn and use .
- Compliant.** Substantially contributes to compliance with most work health and safety laws.
- Reporting.** Reports are sent directly to selected emails (employer, client, other).

What makes RiskAssess good for you and your company?

Hazard identification and your workers Risk Assessment is done on site prior to commencing work.

Report includes time and GPS coordinates, confirming the Risk Assessment was done on site. Having the application installed for everyone makes it part of the organisation's everyday routine.

Documents required by clients for their worksite can be sent direct from the application

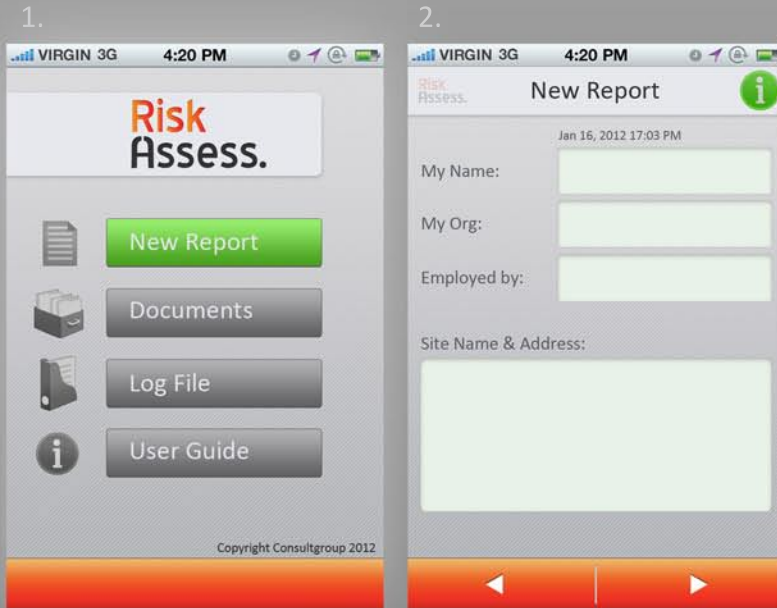

Why RiskAssess instead of traditional format?

The main benefit compared to traditional forms is that RiskAssess is quick and easy.

Quick enough to motivate people to actually complete it on site prior to starting work. Staff cannot just fill in their forms at the end of the day.

It is environmentally friendly requiring avoiding completing paper forms. Use via email direct from site is simple, fast and reliable.

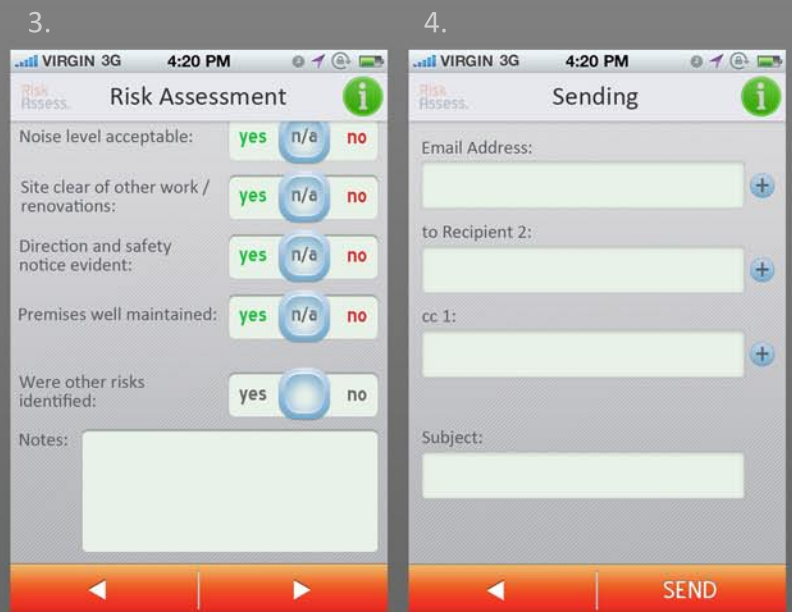

APPLICATION WALKTHROUGH

3. The Risk Assessment consists of 10 questions relating to site hazards and an additional "Notes" section for additional information.

After completing all questions the application warns the user if any site hazards have been identified.

4. The final step before emailing the resulting report is entering or selecting the recipient/s from the Contacts List in your iPhone.
